

California Department of Corrections and Rehabilitation
Health Care Scheduling System (HCSS)
RFP-08-001-ITS

ADDENDUM No. 11
July 16, 2009

Cancellation of the HCSS Procurement

The California Prison Health Care Receivership has recently been reviewing all of its initiatives that were planned for fiscal year 2009/10, including the procurement of a Health Care Scheduling System (HCSS). These reviews are in response to California's fiscal situation, which has been well publicized.

The California Prison Health Care Receivership has decided to include the Health Care Scheduling functionality in the scope of the Strategic Offender Management System (SOMS). This solution will provide California Department of Corrections and Rehabilitation (CDCR) institutions with a health care scheduling solution at a lower cost to the State than a stand alone solution.

Therefore, CDCR cancels this RFP in accordance with RFP Section II, Rules Governing the Competition, subsection "II.5 Disclaimer". The "Disclaimer" subsection states the following:

"The CDCR reserves the right to make one award, multiple awards, or to reject all Proposals, in whole or in part, submitted in response to this RFP. The CDCR reserves the right to make no selection if Proposals are deemed to be outside the fiscal constraint or against the best interest of the California Prison Health Care Receivership."

We wish to extend our thanks to the vendor community for their interest and participation in this procurement. We hope that our actions are understandable in light of California's current fiscal situation. Please continue to periodically monitor our web site (<http://www.cphcs.ca.gov/>) for California Prison Health Care Receivership news and other procurement opportunities in the future.
